**100's of companies in the market selling products that look the same as ours but there are a few major catch involved,**

<b>MOQ</b>	Our MOQ starts from just <b>1 box</b> for all bottles and caps
<b>Quality</b>	We take pride in the quality of products we provide. All our bottles are <b>mfg. under Class 100,000 Clean Room and cGMP standards</b>
<b>Stock Availibilty</b>	One of our USP is that all our products are <b>ready in stock</b> and can be <b>dispatched the same day</b>
<b>Standards</b>	All our products are specially designed and manufactured to suit <b>International pharma regulatory requirements</b> and their standards

### Other companies

With others you have to buy a minimum of **5-10K pcs**

Due to low demand of quality products in the market, most mfg. companies **don't invest in cleanliness and hygiene standards**

You have to wait **atleast 4-6 weeks** to get your products manufactured with others

Major local companies focus on cost reduction by **not following mandatory standards** and thus resulting in **contamination of the packed tablets**

### ③ Caps and Closures

Caps screw on to bottles with the same neck finish size. These caps come with **Induction Sealing Wads** which help the product remain fresh for a longer period of time.

Our caps come in **Continuous Thread (CT)** and **Child Resistant (CRC)** varieties.

Description	33 mm Continuous Thread (CT) Cap	33 mm <u>Child Resistant</u> (CRC) Cap	38 mm Continuous Thread (CT) Cap	38 mm <u>Child Resistant</u> (CRC) Cap	45 mm Continuous Thread (CT) Cap
